## SETTING THE STANDARD

## GTANVDARD <br> 

## The Clipsal Standard Range of Flush Switches, Socket Outlets and Accessories has been a firm favourite for many years, and with good reason.

With pure, uncluttered styling and timeless lines, Clipsal's Standard Range has stood the test of time.

These accessories make it easy to update or replace switches in the thousands of Australian homes built in the 1970s and 80s that already feature Standard Range products.

Today's Standard Range however, features a greater choice of economical flush switches, sockets and accessories than have ever been available before.

Switches in all sizes from mini architrave to large format can be purchased either assembled or as plates only, along with printed mechanisms for specific functions.

## FOR OVER 30 YEARS

Dimmers, fan controllers, time delays, surface, ceiling and other special purpose switches are all available in the Standard Range format.

Socket outlets with features such as Surge Protection, RCD Protection, Timers and Dual Voltage also add to this range to provide for today's requirements.

## Approvals and Certification

Where required, all Clipsal Standard Range products have been approved by The Department Of Energy, South Australia, and carry the
Approval Mark S/1.

## Single/Multi Switch Mechanisms

Clipsal Standard Range products use the 30 Series Switch Mechanism, which is a Trademark of Clipsal Australia Pty. Ltd. Standard Range switches are supplied in one, two, three, four, five and six-gang formats, meaning that the gridplate remains the same size, however, a varying number of switch mechanisms may be used.

Standard size switch dimensions are 115 mm (length) $\times 73 \mathrm{~mm}$ (width) $\times 11 \mathrm{~mm}$ (depth).
Each range of switches and socket outlets have different

Standard Range Switch Product.

31VA

Two
Gang

32VA

Three Gang

33VA prefixes at the beginning of the Catalogue Number.

For Standard Range switches that prefix is ' 3 '. For example, a vertically mounted single gang switch in Standard Range is 31 VA .

Note: Depth refers to the dimensions that switchplate protrudes off the wall surface. It does not include the amount the mechanism recesses into the wall.

This number indicates the number of switch mechanisms included in the product. Note that the size of the gridplate does not change, only the number of switch mechanisms is variable.

## Horizontal or Vertical Formats

Standard Range Catalogue Numbers will also vary depending on whether the switch is vertically or horizontally mounted. For example, 31VA is vertically mounted whereas 31HA is horizontally mounted.
The ' $\mathbf{A}$ ' in the catalogue number refers to the product being Assembled.

31
Four
Gang

Gang

34VA

都

Five

35VA

The letter "V" indicates the product is Vertically Mounted.
$31 \oplus A$
The letter " H " indicates the product is Horizontally Mounted.

33HA

33VA

Four Gang

34HA

## Architrave Switches

## Miniature Architrave Switches

Miniature Architrave size switches are available in one, two and three gang formats.

A ' $T$ ' in the Catalogue Number refers to "miniature" plate size.

Each format has a different size gridplate.
30T dimensions are 54 mm (I) $\times 27 \mathrm{~mm}$ (w) $\times 10 \mathrm{~mm}$ (d).
32TA dimensions are 75 mm (I) $\times 27 \mathrm{~mm}$ (w) $\times 10 \mathrm{~mm}$ (d).
33TA dimensions are 98 mm (I) $\times 27 \mathrm{~mm}$ (w) $\times 10 \mathrm{~mm}$ (d).

## Intermediate Switches

Intermediate switches are available in one and two-gang formats.

A 'B' in the Catalogue Number refers to "intermediate" plate size. An 'L' in the Catalogue Number refers to the mounting centres being spaced further apart.

The gridplate remains the same size for both formats.
31BA \& 32BA dimensions are
95 mm (l) $\times 48 \mathrm{~mm}$ (w) $\times 11 \mathrm{~mm}$ (d).
31BLA \& 32BLA dimensions are
$95 \mathrm{~mm}(\mathrm{l}) \times 48 \mathrm{~mm}(\mathrm{w}) \times 11 \mathrm{~mm}(\mathrm{~d})$.

## Large Format Switches

Large Format switches are available from one to nine-gang formats.

The gridplate remains the same size for all formats. Dimensions are 116 mm (I) $\times 116 \mathrm{~mm}(\mathrm{w}) \times 11 \mathrm{~mm}$ (d) for all products.

## HOW TO ORDER FLUSH PLATES

Standard Range switches can also be purchased with flush plate only (no switch mechanisms). Note "A" is not part of the catalogue number which means no mechanisms are "assembled" in the plate.

See below for one-gang through to six-gang Catalogue Numbers (please note that the 'VH' part of the Catalogue Number means that mechanisms can be mounted either vertically or horizontally).

## How To Order Non-Standard Switches

Switches can also be ordered with features, including neon switch mechanisms and indicators, dimmers, fan controllers, timers, credit card operation, weatherproof versions and other variations.

## Message and Neon Indicator Mechanisms:

Message mechanisms are available in an endless amount
 of configurations (see Pages 57-60 for more details).
Neon indicator mechanisms include 30N-RED \& 30N-
COLOURS. 30/2NM is a switch mechanism with a neon indicator. Please note that flush plates must be purchased separately for these products.

## Sunset Switches

Catologue number arrangement is formed as follows:
31VSSR.

'31' refers to Single Switch Plate
'V' refers to Vertical orientation
'SS' refers to Sunset Switch
' $\mathbf{R}$ ' refers to with Relay

Light Dimmers:
include 32E450L (C-Thru® Leading Edge),
32E450T (C-Thru ${ }^{\circledR}$ Trailing Edge).

32E450L

32E450T

31VSSR is 32 E 500 F .

## HOW TO ORDER <br> NON-STANDARD SWITCHES (CONTINUED)

## Timers - Electronic:

include 31VETR, 31VETR3 \& 31VETF (fans).
'ET' refers to Electronic Timer.
' $\mathbf{R}$ ' refers to Relay (2 wire, no neutral required).
'R3' refers to 3 Wire Relay (3 wire, neutral required).
' $F$ ' refers to Fan.

31VETR \& 31VETR3

31VETF

## Timers - Pneumatic:

include 319, 319RA, 319N, 319HP \& 319X.
All Pneumatic timer products are prefixed with ' $\mathbf{3 1 9}$ '.
'RA' refers to a Reverse Action (operation).
'N' means that the product includes a Neon.
'HP' refers to the product being Hose Proof (weatherproof).
' $\mathbf{X}$ ' means that the product is supplied with an extra switch.
NOTE: Analogue timers are also available, refer page 22.

## Key Tag Switches:

include 36VKT3N, 36VKT3NX, 36VKT4, 36VKT4X.

'V' refers to Vertical.
'KT' refers to Key Tag.
' N ' refers to Neon.
' $\mathbf{X}$ ' refers to Extra Switch.

## Key Operated Switches:

include 31VK1, 31VK1/2, 31VK2, 31VK2/2.
'K1' refers to Key Operated 'One Way’ Switch.
31VK1
'K1/2' refers to Key Operated ‘Two Way’ Switch.
'K2' refers to Key Operated, Locking in both On/Off Positions.
'K2/2' refers to Key Operated 'Two Way', Locking in both On/Off Positions.

## Common Keyed Switches:

include 31VK1CK, 31VK1/2CK, 31VK2CK, 31VK2/2CK.
'CK' - By adding "CK" to Key Operated Switches allows for 'One Common Key' to be used across all switches.

## Ordering Colours

When ordering switches, colour variations also have to be taken into consideration, as the Catalogue Number will change depending on the colour of the product. Each colour has its own 'code', for example, the code for White Electric is 'WE' and the code for Cream is 'CM'. The Catalogue Number for a Standard Range One-Gang Vertically Mounted Switch in White Electric is 31VA,WE.

Refer to 'Standard Range Colours' on page 12 for
 colour options and their corresponding codes.

## HOW TO ORDER

 SWITCHED SOCKET OUTLETSSwitched Socket Outlets are often referred to as GPO's (General Purpose Outlets), Power Points or Power Outlets. So that there is no confusion, the description 'Switched Socket Outlets' will be used throughout this brochure. Single and twin Socket Outlets are available in the Standard Range in horizontal and vertical formats.

Catalogue Numbers will vary depending on the number of sockets and whether the product is horizontally or vertically mounted. Single Switched Socket Outlet dimensions are 115 mm (length) x 73 mm (width) x 14 mm (depth). Twin Switched Socket Outlet dimensions are 115 mm (I) $\times 72 \mathrm{~mm}(\mathrm{w}) \times 14 \mathrm{~mm}(\mathrm{~d})$.

This number indicates the number of sockets included in the product.
The plate size remains the same for both single and twin switched
The letter ' $V$ ' indicates that the product is vertically mounted. Where there is no letter ' $\mathbf{V}$ ', the product is horizontally mounted.

Please note: Single and Twin Automatically Switched Socket Outlets are also available (Catalogue Numbers 10 and 20).
10 dimensions are 115 mm (I) $\times 73 \mathrm{~mm}$ (w) $\times 16 \mathrm{~mm}$ (d).
20 dimensions are 115 mm (I) $\times 73 \mathrm{~mm}$ (w) $\times 16 \mathrm{~mm}$ (d).
If a Quad Socket Outlet is required, this will only be achieved by using the Classic C2000 Range (Catalogue Number C2015D4).

## Large Format Switched Socket Outlets

The Catalogue Number for a Single Switched Large Format Socket Outlet is 15/2, whereas for a Twin Switched Large Format Socket Outlet it is 23.
$15 / 2$ dimensions are 115 mm (I) $\times 115 \mathrm{~mm}(\mathrm{w}) \times 14 \mathrm{~mm}$ (d).
23 dimensions are 145 mm (I) $\times 86 \mathrm{~mm}$ (w) $\times 15 \mathrm{~mm}$ (d).

15/2

14

## Skirting Mounted Switched Socket Outlets

Single Automatic (Catalogue Number 11),
Twin Automatic (Catalogue Number 11/2),
Single Switched (Catalogue Number 16), and
Twin Switched (Catalogue Number 16/2) Skirting Mounted Socket Outlets available.
11 dimensions are 99 mm (I) $\times 45 \mathrm{~mm}$ (w) $\times 17 \mathrm{~mm}$ (d). $11 / 2$ dimensions are 125 mm (I) $\times 50 \mathrm{~mm}$ (w) $\times 17 \mathrm{~mm}$ (d). 16 dimensions are 99 mm (I) $\times 45 \mathrm{~mm}(\mathrm{w}) \times 14 \mathrm{~mm}$ (d). $16 / 2$ dimensions are 168 mm (l) $\times 45 \mathrm{~mm}(\mathrm{w}) \times 13 \mathrm{~mm}(\mathrm{~d})$.

## Intermediate Switched Socket Outlets

The Standard Range also includes a Single Switched Intermediate size Socket Outlet, Catalogue Number 14. Dimensions are 115 mm (I) $\times 61 \mathrm{~mm}$ (w) $\times 13 \mathrm{~mm}$ (d).

11/2

16/2

## Special Features and Options

Standard Range Socket Outlets may also be ordered with special features, including an extra switch mechanism, safety shutters, neons, double pole switched versions, deep plate format products and more. For example, a Single Combination Switched Socket Outlet may be ordered with Safety Shutters (Catalogue Number 15S). Please see the main part of the brochure for Combination and Automatically Switched Socket Outlets with special features.

Refer to 'Standard Range Colours' on page 12 for
 colour options and their corresponding codes.

## STANDARD SERIES COLOURS

The Standard Range offers an unsurpassed choice of decorator colours, from subtle hues to bold vibrant colours for maximum impact. Five colours are available as standard and a further six colours available for a small surcharge. Two chemical resistant colours are available at standard prices.

## Standard Colours

White Electric - WE
Cream - CM

Soft Grey - SG

Brown - BR

Black - BK

## Chemical Resistant Colours

Chemical White - RW
Chemical Soft Grey - RS
$\frac{<}{a}$

Each colour has its own code, which must be added to the end of the Catalogue Number, if that particular colour is desired. For example, if a Vertically Mounted Single Switch in White Electric is desired, the Catalogue Number is 31VA,WE.

## Surcharge Colours

Red - RD

Beige - BG
Dove Grey - DO

Nutmeg - NU

## SWITCHES

## Standard Size Flush Switches

These impact resistant flush plates mount to all standard pattern mounting brackets and wall boxes. Being the most common plate size in the Standard Range, it also offers the largest choice of options.

All vertical models can be converted to horizontal by removing mechanisms and turning them $90^{\circ}$ before replacing. All models have a base projection of 15 mm and room projection of 11 mm .

## ARCHITRAVE AND MINIATURE ARCHITRAVE SIZE FLUSH SWITCHES

## Architrave Size Flush Switches

Architrave switches are available in models with one to four switches. Also available is a single switch model with a deep plate and a double pole version for caravans, mobile homes and similar.

## Miniature Architrave Switches

Miniature Architrave switches are available in single, two or three gang models. They are designed for use in areas where space is at a premium. All models are suitable only for direct fixing.

## INTERMEDIATE AND LARGE FORMAT SIZE FLUSH SWITCHES

## Intermediate Size Switches

One or two gang intermediate size models offer the convenience of either wall or architrave mounting. This range offers the option of two mounting centres, $55 \mathrm{~mm}(B)$ and 78 mm (BL).

| INTERMEDIATE SIZE SWITCHES |  |  |  |  |  |  |  |  |  |

## Large Format Size Flush Switches

These Large Format Switches are used mainly to replace older accessories, particularly in locations such as hospitals and schools. Impact resistant, the flush plates are available with up to nine mechanisms.

Plates mount to Standard two gang pattern 157/2 and 164/2 Metal Wall Boxes, 257D2 PVC Deep Wall Boxes, 448 and 448SD Surface Mounting Blocks, 156/2 Mounting Brackets and 154/2 Mounting Clips.

All Large Format Switches have a base projection of 14 mm .

LARGE FORMAT SIZE FLUSH SWITCHES - VERTICAL MOUNTING

## FLUSH PLATES

## Standard Size Flush Plates

Flush plates can be purchased without the 30M Switch for convenience and increased choice. They are available in Miniature, Architrave, Standard and Large Format sizes.

A series of blank plates are also available for particular applications, such as the termination of unused or looped cables, mounting of custom equipment or simply blanking off unused openings in wall/wall cladding.

Unused 'gangs' can be blanked off with 30P. (see Page 60).

## IP54 Rated Weatherproof Switch

The 31VHWP is an attractive switchplate designed for use in outdoor locations such as stairwells, barbecue areas and gazebos.

Completely weatherpoof, the switchplate is particularly suitable for 30 Series illuminated press buttons and switch mechanisms that are easy to see at night.

The secret of the switchplate is the translucent rubber membrane that keeps out water and dust, yet still enables easy switching.

For more information, check the Clipsal Standard Range Weatherproof Switchplate flyer O/N 17771.

IP54 RATED WEATHERPROOF FLUSH SWITCH

| Cat. No. | Length | Width | Depth | Mounting Centres | 0 |

A Clipsal C-Thru® Light Dimmer lets you adjust the lighting levels in any area, for any occasion. For instance, you may want to add a little romance to an intimate dinner, create the right mood for a movie, or leave just enough light on to navigate your way to the bathroom during the night.

In commercial environments too, light dimmers have an almost endless number of applications. Auditoriums, restaurants and boardrooms are just a few of the possible locations in which a light dimmer will offer you full control of lighting to suit any occasion, and the new C-Thru ${ }^{\oplus}$ Light Dimmers enable you to choose the right dimmer, first time - every time.
In a market first, Clipsal has teamed up with other industry leaders and lighting manufacturers to colour code both dimmer and load, allowing unprecedented ease in compatible product selection. Never before has it been so simple to choose the right dimmer or fan control product to suit your application.

The C-Thru ${ }^{\circledR}$ Light Dimmer unit comprises a separately switched, compact, modular dimming mechanism rated at 450W (1.8A). The units utilise state-of-the-art Leading Edge and Trailing Edge dimming technology to provide full control of incandescent and low voltage lighting (using either iron core or electronic transformers).

The C-Thru ${ }^{\oplus}$ Product Range is suitable for use in any new installation, but is also retrofittable, and may be used to replace a standard switch in any existing installation.

Please note that the C-Thru ${ }^{\oplus}$ Range of Dimmer and Fan Speed Control products is immune to the effects of high frequency (ripple) signal injection on the mains voltage supply. These signals are commonly injected onto the mains by the supply authority for such applications as offpeak hot water switching and remote meter monitoring. This unique Australian design innovation ensures true flicker-free dimming operation.

## Load Compatibility

Each product in the Clipsal C-Thru ${ }^{\circledR}$ Product Range is colour coded to indicate load compatibility. This colour coding concept allows easy selection of the right dimmer for your application.

| Load Symbol | Compatible Loads | C-THRU® COLOUR |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  |  | Leading <br> Edge Dimmer 32E450L Series 450W | Trailing Edge Dimmer 32E450T Series 450W | Fan Speed Controlle 32E500F Series 500W |
| $-$ | Incandescent lighting Halogen 240 V lamps | $\sqrt{ }$ | $\sqrt{ }$ | $\cdots$ |
| II\\| | Low voltage lighting with iron-core transformers | $\sqrt{ }$ | $\cdots$ | K |
| - $\square^{(1)}$ | Low voltage lighting with electronic transformers | K | $\checkmark$ | K |
| (M) | Exhaust fans <br> (shaded pole <br> induction motors) <br> Ceiling fans <br> (split-phase induction <br> motors) |  | $K$ | $\checkmark$ |

Recommended C-Thru® Dimmer/ Fan Control Loads

Please note: the colour coding scheme outlined above is the subject of an exclusive Clipsal patent.

## C-Thru® Fan Speed Controller

The C-Thru* Fan Speed Controller unit is rated at 500W (2A), and may be used to provide continuous variable speed control of motor loads such as ceiling sweep fans and exhaust fans.

C-THRU® FAN SPEED CONTROLLER

| Cat. No. | Length | Width | Depth | Mounting Centres |

This range is available in White Electric (WE) only.

## Electronic Timer Controls

Time delay switches are a convenient way of saving energy in both domestic and commercial applications such as toilets, bathrooms, stairwells, passageways and other areas that are occupied for a limited or known time, ensuring electrical loads are switched OFF when not in use.

Clipsal offers three types of time delay switches.
The 31VETR is a push-button electronic time delay switch for loads up to 10A. The timer can be set between 15 seconds and 254 minutes. A remote switching function is also included. Another push-button electronic time delay switch is the 31VETR3 which includes remote switching facilities. The time setting can be set from 10 seconds to 15 hours. The 31VETF incorporates two switched outputs and can be used to turn the fan load on at the same time as the light, making it ideal for bathrooms and toilets. When the light is switched off, the fan will remain on for a period of time that can be set from 2 to 20 minutes.

All models have a base projection of 29 mm and all terminals accommodate $2 \times 2.5 \mathrm{~mm}^{2}$ cables.

## ELECTRONIC TIMER CONTROLS

## Pneumatic Time Delay Switches

Pneumatic Time Delay switches are robust timers that operate by using air pressure. When the switch is 'pushed in', the load will remain on until the switch 'pops out'. The pneumatic pressure can be set by the installer, allowing time ranges of 2-10 minutes (with care, 20 minutes).
PLEASE NOTE: Rotate the control knob carefully and in very small increments (over tightening will damage the tapered valve).

This time switch operates on the air bleed principle and therefore it is not possible to calibrate it too exactingly. The timing will vary slightly with manufacturing tolerances, air temperatures, relative humidity and barometric pressure. Pneumatic Timers are most commonly used in units to operate the lighting in stairwells and other public places such as schools and gymnasiums.

Adjusting Pneumatic Time Delay Switches

## Analogue Timer Controls

Analogue timer controls are available in both switch, socket and portable socket outlet configurations. Connected Loads can be set by the user to turn ON and turn OFF at different times of the day according to the users requirement. Multiple scheduled switching events are supported by all models.

## SUNSET SWITCH, BOOSTER ELEMENT RELAYS \& SWITCH MULTIPLIERS

## Sunset Switches

Sunset Switches cleverly operate lighting in response to the surrounding light levels. Only switching lights on when they are needed, Sunset Switches are convenient and they save money.

The 31VSSR will automatically turn on a connected load when the ambient light level falls below 10 LUX (at around sunset). The load will then turn off the next morning when the light level exceeds 30 LUX. Delays of around 8 seconds for turn off and 30 seconds for turn on take into account any short term changes in light levels that may turn the light on or off.

For more information, check the Clipsal 31VSSR Automatic Sunset Switch brochure O/N 892-912.

| SUNSET SWITCH |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Cat. No. | Length | Width | Depth | Mounting Centres |  |  |  |
| 31VSSR | 115 mm | 74mm | Plate - 13mm Mech - 30 mm Box-37mm | 84mm apart |  |  |  |
| 31VSSR | A Sunset Switch, 250V/10A, 16 hours, 2 wire, IP56 (standard size). |  |  |  |  |  |  |

Please refer to the 56 \& 66 Series Industrial brochure, 0/N 826-812 for information about the 56SSR \& 56PEDD3 Sunset Switches.

## Booster Element Relay

The 31VBER is a Booster Relay for a solar hot water element. The relay drops out when the water reaches a certain temperature, returning to solar operation. The push button switch incorporates a neon indicator to illuminate when the Booster Element is operating.

## Switch Multipliers

Switch multipliers are used to add additional circuits to existing single circuit installations and also provide two-way switching to an existing single switch installation. They are used instead of wall chasing and running wires down the wall. In this way, they save both time and money.

## SWITCH MULTIPLIERS

## UNDERVOLTAGE RELAYS \& KEY TAG TYPE SWITCHES

## Under Voltage Relays

Specifically designed to reduce overloads to airconditioners and other sensitive equipment during under voltage (brown-out) situations, the relay switching to open circuit. Excessive loads caused by high in-rush currents when supply is restored are prevented by the manual reset operation requirement, allowing time to full load restoration.

Under Voltage Relays are designed to drop power to the outlet when an under voltage supply condition (or a 'brownout') occurs.

UNDER VOLTAGE RELAYS

| Cat. No. | Length | Width | Depth | Mounting Centres |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |

| 15X15RZ | A | Single Power Outlet, 250V/15A (with no volt relay and reset switch). |  |  |  |
| 15XRZ | B | Single Power Outlet, 250V/10A (with no volt relay and reset switch). |  |  |  |
| 32VRZ | C | No Volt Relay and Reset Switch, 250V/10A, (standard size). |  |  |  |
| 32VRZ15 | C | No Volt Relay and Reset Switch, 250V/15A, (standard size). |  |  |  |

## Key Tag type switches and Key Operated Switches

Clipsal's Standard Range Key Tag Switches and Room Access Card Operated Switches are the ideal form of energy management for hotels, motels and other locations where power can be left on unnecessarily.

Inserting the key Tag or card into the switch activates selected circuits to operate lighting, air-conditioning, television, radio and other appliances. Circuits to refrigerators and other equipment that need to continually run are not connected to the switches. Removing the key Tag or card automatically cuts off power to all of the circuits to significantly reduce power wastage.

Refer to adjacent page for detailed information on this range.

| KEY TAG TYPE SWITCHES |  |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |

* Depth does not include key height.

## COMMON KEYED SWITCHES

[^0]Note: Common key number is 60051.

## Ceiling Switches

Ceiling switches can be used to operate lights, fans and even hot water boosters. They are convenient in that wires do not have to be run down the wall and they can also be placed in an easier switching position, for example, near a bed.

## WILCO CEILING SWITCH

| Cat. No. | Length | Width | Depth | Mounting Centres |
| :--- | :--- | :--- | :--- | :--- |
| PC1 | 57 mm | 45 mm | 18 mm | $30 \mathrm{~mm} \times 28 \mathrm{~mm}$ |
| PC1 | A | Ceiling Switch, Pull Cord, 10A, double pole with indicator <br> (available in White Electric - WE). |  |  |

## Foot Operated Switch

The 360 foot operated switch is very handy when installed under desks to operate heaters, lighting or fans. It can also be placed in other convenient positions when 'foot switching' is preferred.

## FOOT OPERATED SWITCH

| Cat. No. | Length | Width | Depth | Mounting Centres |
| :--- | :--- | :--- | :--- | :--- |
| $\mathbf{3 6 0}$ | 93 mm | 55 mm | 29 mm | $68 \times 18 \mathrm{~mm}$ apart |
| $\mathbf{3 6 0}$ | A | Foot Switch, $250 \mathrm{~V} / 10 \mathrm{~A}$, double pole. |  |  |

[^1]AMERICAN STYLE FLUSH SWITCHES AND PLATES - INDIRECT MOUNTING

[^2]
## SURFACE \& PUSH BUTTON SWITCHES

Surface switches are traditional switches that existed before the introduction of the 30 Series mechanism. They are an economical alternative to the Heritage Range if a traditional look is preferred.

## Circuit Identification Products

Clipsal offers a range of Circuit Identification products to make your job easier.

CIRCUIT IDENTIFICATION PRODUCTS

| Cat. No. |  | ngth | Width | Depth | Mounting Centres |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 30P, 30PFO |  | mm | 21 mm | 10 mm |  |  |
| 30PID |  | mm | 21mm | 7 mm |  |  |
| 30P | A ${ }^{\text {R }}$ Removable Blank Plug, suits 30 Series. |  |  |  |  |  |
| 30PFO | B | Plug, marked "FRIDGE - FREEZER ONLY". |  |  |  |  |
| 30PID | C | 30 Series ID Circuit Plug, tamper proof. |  |  |  | C |
| 30PIDA4L* | D | Label Sheets, $10 \times$ A4 packet (RD, BU, GR, YL, WE colours available). |  |  |  |  |
| 9 | E | Cap, suits switch plate screw recesses. |  |  |  | \# \# |
| 9SERIES | E | Identi-Caps for Circuit Identification. |  |  |  |  |

*Software for printing these Label Sheets are available on the Alfred CD-ROM Electronic Trade Product Guide.

## Mounting Accessories

Mounting Accessories are for use when mounting 30 Series mechanisms without a flush plate, for example, in a panel or enclosure.

MOUNTING ACCESSORIES

## CAble Connection accessories

## Cable Connection Accessories

Cable Connection Accessories are used for safety and to anchor cables.

[^4]
## PROTECTED SWITCHES - MOULDED

PROTECTED SWITCHES - 250V, 10A, ZINC DIE CAST

PROTECTED SWITCHES - 250V, 16A, ZINC DIE CAST

Automatically switched socket outlets are most commonly used to supply power to computers, refrigerators, microwaves and other accessories that don't need to be switched off at the socket. Simply inserting the plug into the outlet provides power to equipment. Removing the plug opens the contacts in the socket to provide the same level of safety as a conventional switched socket when switched off.

Automatically switched socket outlets are also advantageous in that an appliance which is plugged into it can be switched on or off from a more convenient location, saving time and effort for more valuable activities.

Available in the Standard Range are single and double automatically switched socket outlets, with a weatherproof version (ideal for caravans) and a product with a security flap.

The socket outlets are manufactured in accordance with AS/NZ 3100, AS/NZ 3112, AS/NZ 3133 and other relevant Standards Australia Approval and Testing Specifications, Wiring Rules and Supply Authority requirements.

| FOS105T | ESingle Automatically Switched Socket Outlet, 250V/15A, 3 flat pins. <br> extra low voltage. |  |  |  |

All models available less lugs (add 'LL' to cat. no.).
All models are available in Grey - GY only.

ELECTRIC CLOCK CONNECTION ACCESSORIES

[^5]

The Standard Range offers a huge variety of Switched Socket Outlets. Available in 10 and 15A ratings, vertical and horizontal formats, they also come with a number of options such as neons, extra switches and safety shutters, not to mention two-piece base versions and more. Also available are large format, intermediate and skirting mounted versions.
All terminal screws face the same direction and are backed off for easy cable insertion. Socket terminal bores are 5.5 mm .
Switched Socket Outlets are manufactured in accordance with AS/NZ 3100, AS/NZ 3112, AS/NZ 3133 and other relevant Australian and New Zealand Standards, and comply with all relevant Wiring Rules and Electrical Authorities' requirements.

## Double Pole Switched Socket Outlets

The safety features of double pole switched sockets has led to them becoming an integral part of electrical accessories in recent times. Standard Range double pole switched socket outlets enable marine craft, caravan and mobile home manufacturers to install double pole switched sockets in their boats, vans and homes to comply with AS/NZS3000 requirements.

## Protected Switched Socket Outlets

Electricity brings with it the life threatening danger of electrocution, and accidents do occur. Clipsal Residual Current Devices are renowned for being at the forefront of RCD technology. The 15/15EL and 25EL Series are RCD protected single and twin socket outlets that provide a simple method of individual circuit protection for your safety.

They simply replace existing socket outlets and work by protecting not only their own outlet(s) but all 'downstream' outlets on the same circuit. If a fault occurs, power will be cut in less than 40 milliseconds. The 10 mA versions are most commonly used in hospitals and similar locations, whereas the 30mA versions are used in homes and offices.

Surge protection is ideal for protecting electronic devices (computers, TVs, stereos) from damage against harsh surge and spike voltages that can occur on the mains supply to the premises. They could save you thousands of dollars protecting expensive electronic equipment. Please refer to the top of the next page for technical information and dimensions for this range.

## SAFETY, COOKER SOCKET \& PLUG AND UNIVERSAL SHAVER OUTLETS

## Protected socket outlets

## Cooker Socket Outlet and Plug

The Cooker Socket Outlet and plug are used so that the stove in a new home can be plugged in by the end user at the last stages of development rather than hard wired by the electrician. This is so that the stove is not a 'sitting duck' in a new home during development for thieves to steal. When maintenance or cleaning is required, it also means that the stove can be unplugged safely.

## COOKER SOCKET OUTLET AND PLUG

| Cat. No. | Length | Width | Depth | Mounting Centres |
| :--- | :--- | :--- | :--- | :--- | :--- |
| 31VCS | 115 mm | 73 mm | 11 mm | 84 mm apart |
| 800CL | A | $1.8 \mathrm{~m}, 4 \mathrm{~mm}^{2}$ Cord, with $250 \mathrm{~V} / 32 \mathrm{~A} 3$ pin plug. |  |  |
| 31VCS | B | 3 Pin Cooker Socket on Standard Plate, $250 \mathrm{~V} / 32 \mathrm{~A}$ (suits 800 CL ). |  |  |

## Universal Shaver Outlets

Universal Shaver Outlets are used in hotels where international customers require different voltage outlets and an outlet to plug their shavers into. These are superb products for hotels.

UNIVERSAL SHAVER OUTLET

| Cat. No. | Length |  | Width | Depth | Mounting Centres |  |  |  |  |  |

| 727H | B | B Universal Shaver Outlet, Dual Voltage, 240V-110V (horizontal mount). |  |  |  |  |  |  |  |  |
| 727V | C | Universal Shaver Outlet, Dual Voltage, 240V-110V (vertical mount). |  |  |  |  |  |  |  |  |

## TV Antenna Connection Accessories

Computers and fax machines are now an everyday part of our lives, not only in the office, but also in our homes. The Standard Range includes TV and communications accessories for every application.

## 75 Ohm Coaxial Sockets

There are four 75 Ohm coaxial TV sockets available in Standard Range gridplates. Each provides a secure connection to antenna cables to ensure optimum reception.

Included in the range is a two gang plate with a TV/FM splitter between TV and radio or other signals to be divided amongst different receivers.

Also included in the Standard Range of telecommunications' accessories is a gridplate that enable easy installation of printed circuit boards.

| 30TV75S | A | Coaxial Cable Surface Socket, 750 hm. |  |  |  |

## ANTENNA MECHANISMS

## Fly Leads

Fly leads are loose, floating cable as opposed to being hard wired, meaning that they are 'free and floating' to allow them to be attached between two points.

| FLY LEADS |  |  |  |
| :--- | :--- | :--- | :--- |
| Cat. No. | Description |  |  |
| $3105 F L 118 \mathrm{MW}$ | A Male to Male Fly Lead, 1.8M. | Bale to Female Fly Lead, 1.8 M. |  |
| $3105 F L 118 \mathrm{FW}$ | B | M105FL118MW |  |

## Improved Chemical Resistance

The majority of Clipsal products are manufactured from polycarbonate, which provides excellent performance across a broad spectrum of specific applications. However, the high standards of hygiene required in hospitals and food related industries sometimes involve the use of harsh chemicals which can degrade polycarbonate.
To address these problems, Clipsal have worked closely with their material suppliers to develop an alloy resistant to these chemicals and with only a minimal reduction in impact strength.

The Standard Industrial Range is limited at this time to 16 products and 2 colours. Resistant White (RW)

This table should be used as a guide only. Any end user should test to evaluate the suitability of any chemical, with
any plastic.

EXCELLENT Recommended; no adverse effects after extended exposure.
GOOD Acceptable; minimal loss of mechanical properties after long periods of exposure.
FAIR Marginal acceptability; loss of mechanical properties after long periods of exposure.
POOR Not recommended for use.

## PROTECTED SWITCHED SOCKET OUTLETS

Where power is required in Commercial and Industrial applications, the Clipsal Protected Switched Socket range is the perfect product. Built tough to last, and in a number of configurations to suit your needs, this range stands the test of time.

The range is available in zinc die cast and you will find matching switch outlets on page 31.
Please see the table below for details on the full range, including dimensional specifications.

PROTECTED SWITCHED SOCKET OUTLETS - 10A

PROTECTED SWITCHED SOCKET OUTLETS - 15A

## The Clipsal switch shape was always destined for greatness.

It was first developed in 1963 and proved to be a great leap forward. Unsatisfied with the hard lines of traditional switch rockers at the time, Clipsal engineers fashioned a more stylish alternative. The Standard Range of Switches and Socket Outlets was the first to use the new switch shape.
Over the years the Clipsal switch shape has undergone very subtle changes to adapt to new technologies, plastics and designs. But to the naked eye the original design remains unchanged and is as strong today as it was many years ago. Today, you'll find the Clipsal switch shape in dozens of different switch designs.
The 30 Series can easily be converted from vertical to horizontal mounting by removing the mechanism and turning it through $90^{\circ}$. Most switch bases fit a 22 mm diameter hole and have terminal bores of 4.1 mm unless specified otherwise.

Switch assemblies are also available with the switch mechanisms further secured by screws located behind the switchplate. These assemblies are designed to prevent the mechanisms being forced out of the switchplate which is important when the switches are used in areas where they may be subjected to vandalism or undue physical abuse.

The gentle curves of the overall shape are equally proportioned to provide uncomplicated symmetry. It is this flexibility and strength in design that has enabled the Clipsal switch shape to adapt to just about every Clipsal switch and socket range that has been designed since the 1960s.

Quality Assurance surrounds everything Clipsal does and production of the Clipsal switch shape is no exception. Clipsal was the first Australian manufacturer of electrical wiring accessories to achieve quality endorsed status and is now recognised by quality status systems around the world.
It is this commitment to quality that has given the Clipsal switch shape its longevity. Its sleek styling was an immediate success.

And through Clipsal's dedication to perfection and continuous improvement it has remained so. Indeed, we like to think it will always be that way.

The shape of the switch dolly is a trademark of Clipsal Australia Pty Ltd

## 30 SERIES SWITCH MECHANISMS

## SWITCH MECHANISMS

Note: 30M Series products have fluorescent capacity of approximately 5 A . 30 MD and 30MI are not recommended for switching of multiple fluorescent fittings.

SWITCH MECHANISMS (Continued)

## NEON INDICATOR MECHANISMS

Colours available are Blue, Green, Amber and Transparent. Other voltages are also available, including 6, 12, 24, 32, 48, 110 and 440 . Suitable for DC loads. To order, add voltage to Cat. No. (for example, 30N12). Neons draw $250-275 \mathrm{~mW}$ at 240 V . Note: Inductive loads occasionally cause neons to glow in OFF position. To prevent this, place a $47 \mathrm{k} \Omega, 0.5 \mathrm{~W} 240 \mathrm{~V}$ resistor across the terminals. Neutral and Active can be connected to either terminal.

## Labelled Switch Mechanisms

Clipsal offers a broad range of labelled switch mechanisms for easy identification when several switches are installed on the same switchplate or when there is any chance of confusion over the load controlled.

## 10A MECHANISMS - WITH MESSAGES

## Changeover Mechanism

SCHEMATIC WIRING DIAGRAMS (Continued)

One Way Switching

Two Way Switching

Note: All C-Thru ${ }^{\oplus}$ dimmer plate variants are supplied with a $30 / 1 / 2 \mathrm{LM}$ switch mechanism. This mech is designed to be reconfigurable:
DEFAULT STATE: 1-WAY WITH TWO LOOPING TERMINALS (marked "LOOP" and "2" above).
ALTERNATE STATE: 2-WAY WITH ONE LOOPING TERMINAL (which is marked "LOOP" above).
To change over, remove terminal screws and interchange " 2 " and "LOOP" terminal poles/contacts. Reinsert screws and terminate wiring as usual.

| 31VSSR | Sunset Switch, 250V/10A, 16 hours, 2 wire, IP56 (standard size). | 115 mm | 74mm | 50 mm | 84mm apart | 23 |
| BOOSTER ELEMENT RELAY |  |  |  |  |  |  |
| 31VBER | Booster Relay for Solar Hot Water Element, 250V/15A. | 115mm | 73mm | $\begin{gathered} \text { plate - } 16 \mathrm{~mm} \\ \text { button }-4.5 \\ \text { wall recess }-29 \mathrm{~mm} \\ \hline \end{gathered}$ | 84mm apart | 23 |
| SWITCH MULITPLIERS |  |  |  |  |  |  |
| 780/1 | Switch Multiplie, 250V/10A, 1 way. | 96 mm | 70 mm | 48 mm | 73 mm aparf | 23 |
| 780/2 | Switch Multiplier, 250V/10A, 2 way. | 96 mm | 70 mm | 48 mm | 73 mm apart | 23 |
| 780K1 | Switch Multiplier, 250V/10A, 1 way (with 2 gang architrave switch assembly). | 96 mm | 70 mm | 48 mm | 73 mm aparf | 23 |
| 780K2 | Switch Multiplier Mechanism, 250V/10A, 2 way. | 96 mm | 70mm | 48mm | 73mm apart | 23 |
| 780M | Switch Multiplier Mechanism, 250V/10A. | N/A | N/A | N/A | N/A | 23 |
| 780A2M | Switch Multiplier Mechanism (suits 2 loads 2 way type A bias). | N/A | N/A | N/A | N/A | 23 |
| 780B2M | Swith Multiplier Mechanism (suits 2 loads 2 way type B bias). | N/A | N/A | N/A | N/A | 23 |
| UNDER VOLTAGE RELAYS |  |  |  |  |  |  |
| 15X15RZ | Single Power Outlet, $250 \mathrm{~V} / 15 \mathrm{~A}$ (with no volt relay and reset switch). | 115 mm | 73 mm | 11 mm | 84mm apart | 24 |
| 15XRZ | Single Power Outlet, 250V/10A (with no volt relay and reset swith). | 115 mm | 73mm | 11 mm | 84mm apart | 24 |
| 32VRZ | No Volt Relay and Reset Switch, 250V/10A (standard size). | 115 mm | 73 mm | 11 mm | 84 mm apart | 24 |
| 32VRZ15 | No Volt Relay and Reset Switch, 250V/15A (standard size). | 115 mm | 73 mm | 11 mm | 84mm apart | 24 |

KEY TAG TYPE SWITCHES - 250V a.c.

| Cat ${ }^{\text {No}}$ | Description | Length | Width | Depth | Mounting Centres | PAGE |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 36VKT3N | Kee Tag Swith, suits 3x20A, 1/2way circuit with neon. | 115 mm | 73 mm | 11 mm | 84mm apart | 25 |
| 36VKT3NX | Key Tag Swith, suits 3x20A, 1/2way circuit, neon, exta 250V a.c. 10A swith mech. | 115 mm | 73 mm | 11 mm | 84mm apart | 25 |
| 36VKT4 | Key Tag Type Switch, suits 4x20A, 1/2way circuits. | 115 mm | 73 mm | 11 mm | 84mm apart | 25 |
| 36VKT4X | Key Tag Type Switch, suits 4x20A, 1/2way circuit, exta 10A 250V a.c. swith mech. | 115 mm | 73 mm | 11 mm | 84mm aparf | 25 |
| KEY TAC ONIY |  |  |  |  |  |  |
| 35VKT | Key Tog, suits 35VKT series switches. | 120 mm | 45 mm | 5 mm | N/A | 25 |
| 2034VKT | Short Key Tag, suits 2034VKT series swithes. | 92 mm | 40 mm | 7 mm | N/A | 25 |
| KEY OPERATED SWITCHES - 250V, 20A/16AX |  |  |  |  |  |  |
| 31VK1 | Key Operated Switch, 1 way (locks in Off position). | 115 mm | 73 mm | 11mm | 84 mm apart | 25 |
| 31VKI/2 | Key Operated Switch, 2 way (locks in Off position). | 115 mm | 73 mm | 11 mm | 84mm apart | 25 |
| 31VK2 | Key Operated Switch, 1 way (locks in On and Off position). | 115 mm | 73 mm | 11 mm | 84 mm apart | 25 |
| 31VK2/2 | Key Operated Switch, 2 way (locks in On and Off position). | 115 mm | 73 mm | 11 mm | 84mm apart | 25 |
| COMMON KEYED SWIICHES |  |  |  |  |  |  |
| 31VKICK | Key Operated Switch, 250V 20A/16AX, 1 way (locks in Off position). | 115 mm | 73 mm | 11 mm | 84mm apart | 25 |
| 31VK1/2CK | Key Operated Switch, 250V 20A/16aX, 2 way (locks in Off position). | 115 mm | 73 mm | 11 mm | 84mm apart | 25 |
| 31VK2CK | Key Operated Switch, 250V 20A/16AX, 1 way (locks in On and Off position). | 115 mm | 73 mm | 11 mm | 84mm apart | 25 |
| 31VK2/2CK | Key Operated Switch, 250V 20A/16AX, 2 way (locks in On and Off position). | 115 mm | 73 mm | 11 mm | 84mm apart | 25 |
| CEILING SWITCHES |  |  |  |  |  |  |
| 306 | Ceiling Switch, 250V/15A, 1 way. |  |  | 71 mm | 39 mm | 26 |
| 342 | Ceiling Switch, 250V/10A, 1 way. |  |  | 71 mm | 39 mm | 26 |
| 343 | Ceiling Switch, 250V/10A, 2 way. |  |  | 71 mm | 39 mm | 26 |
| 346 | Ceiling Switch, 250V/15A, 1 way. |  |  | 71 mm | 39 mm | 26 |
| WIICO CEALING SWIICH |  |  |  |  |  |  |
| PCI | Ceiling Switch, pull cord, 10A, double pole with indicator. | 57 mm | 45 mm | 18mm | $30 \mathrm{~mm} \mathrm{x} \mathrm{28mm}$ | 26 |
| FOOT OPERATED SWITCH |  |  |  |  |  |  |
| 360 | Foot Operated Switch, 250V/10A, double pole. | 93mm | 55 mm | 29mm | $68 \times 18 \mathrm{~mm}$ apart | 26 |
| AMERICAN STYLE FLUSH SWIICHIS AND PLATES - INDIRECT MOUNTING |  |  |  |  |  |  |
| 321 | 1 Gang Switch Plate. | 115 mm | 70 mm | 8 mm | 60 mm apart | 27 |
| 321R | Switch Plate, suits one socket. | 115 mm | 70 mm | 8 mm | 60 mm apart | 27 |
| 322/1R | Switch Plate, suits 1 switch and 1 socket. | 116 mm | 116 mm | 8 mm | $60 \times 46 \mathrm{~mm}$ | 27 |
| 320 | Switch Mechanism, 250V a.c./10A, 1 way. | 93 mm | 35 mm |  | 84 mm apart | 27 |
| 320/15 | Switch Mechanism, 250V a.c./15A, 1way. | 93 mm | 35 mm |  | 84 mm apart | 27 |
| DC3 | Flush Switch, 54,3 terminal, 1 way, d.c. (with mounting lugs). | 93mm | 35 mm | 36 mm | 84mm apart | 27 |
| DC3-SPDT | Flush Switch, 5A, 3 terminal, single pole/double throw, d.c. (with mounting lugs). | 93 mm | 35 mm | 36 mm | 84 mm apart | 27 |
| WSWI10 | Flush Switch, 10A, 1 way. | 93 mm | 35 mm | 32 mm | 84mm apart | 27 |
| WSWI10/TW | Flush Switch, 10A, 2 way. | 93 mm | 35 mm | 32 mm | 84mm apart | 27 |
| WSW116 | Flush Switch, 16A, 1 way. | 93 mm | 35 mm | 32 mm | 84mm apart | 27 |
| WSW116/TW | Flush Switch, 16A, 2 way. | 93 mm | 35 mm | 32 mm | 84mm apart | 27 |
| FS169/I | Flush Switch, 10A, intermediate (with mounting lugs). | 93 mm | 35 mm | 22 mm | 84mm apart | 27 |
| FS169/15DPDT | Flush Switch, 15A, intermediate, double pole/double throw (with mounting lugs). | 93 mm | 35 mm | 22 mm | 84mm apart | 27 |
| WILCO SURFACE SWITCH |  |  |  |  |  |  |
| SS165/15/2 | Sufface Switch, 15A, 2 way, 3 terminal, screw secured cover ( 52 mm diameter). |  |  | 17 mm | 36 mm apart | 28 |
| SURFACE SWIICHES - 250V |  |  |  |  |  |  |
| 362 | Sufface Switch, 10A, 1 way, 3 terminal. |  |  | 19mm | 48mm apart | 28 |
| 362/15 | Suface Switch, 15A, 1 way, 3 terminal. |  |  | 19mm | 48mm apart | 28 |
| 363 | Sufface Switch, 10A, 2 way, 4 terminal. |  |  | 19mm | 48 mm aparf | 28 |
| 389 | Suface Switch, 25A a.c., 32V d.c., 1 way. |  |  | 27 mm | 43 mm aparf | 28 |
| BELL PRESS |  |  |  |  |  |  |
| 98 | Bell Press, illuminated. | 60 mm | 25 mm | 19mm | 48mm apart | 28 |

WIICO PUSH BUTITON SWIICHES - WIIH COLLAR AND LOCKNUT

| Cat No | Description | Length | Width | Depth | Mounting Centres | PAGE |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| PBS136 | 2 A , single pole. | 28 mm | 15mm | $\begin{gathered} 28 \mathrm{~mm} \\ \text { (Room protrusion }-18 \mathrm{~mm} \text { ) } \end{gathered}$ | N/A | 28 |
| PBS236 | 2A double pole. | 28mm | 15mm | $\begin{gathered} 34 \mathrm{~mm} \\ \text { (Room protrusion }-18 \mathrm{~mm} \text { ) } \end{gathered}$ | N/A | 28 |

| CIRCUIT IDENTIFICATION PRODUCTS |  |  |  |  |  |  |
| 30P | Removable Blank Plug, suits 30 series. | 21 mm | 21mm | 10 mm |  | 29 |
| 30PFO | Plug, marked "FRIDGE-FREEZER ONLY". | 21 mm | 21mm | 10 mm |  | 29 |
| 30PID | 30 Series ID Circuit Plug, tamper proof. | 21 mm | 21mm | 7 mm |  | 29 |
| 30PIDA4L | Label Sheets, $10 \times$ A4 packet (RD, BU, GR, YL, WE colours available). | N/A | N/A | N/A | N/A | 29 |
| 9 | Cap, suits swith plate screw recesses. |  |  | 5 mm | N/A | 29 |
| 9SERIES | Identi, caps for circuit identification. |  |  | 5 mm | N/A | 29 |
| MOUNTING ACCESSORIES |  |  |  |  |  |  |
| ET30 | Screw Mounting Earthing Terminal. | 6 mm | N/A | N/A | N/A | 29 |
| B30GFZ | Mounting Clip with Moulded Surround. | 45 mm | 27mm | 11 mm | 24 mm aparf | 29 |
| F30Z1 | Mounting Clip Mechanism, suits 1 mm thick sheet. | 29 mm | 29 mm | N/A | N/A | 29 |
| F30Z1.5 | Mounting Clip Mechanism, suits 1.5 mm thick sheet. | 29 mm | 29mm | N/A | N/A | 29 |
| F30Z2 | Mounting Clip Mechanism, suits 2 mm thick sheet. | 29 mm | 29 mm | N/A | N/A | 29 |
| F30Z4 | Mounting Clip Mechanism, suits 4m thick sheet. | 29 mm | 29mm | N/A | N/A | 29 |
| 31/3F | Three Gang Mounting Flange. | 162 mm | 116 mm | 11 mm | 92mm apart | 29 |
| CABLE CONNECTION ACCESSORIES |  |  |  |  |  |  |
| 31VXCB | Blank Plate with 30A Connector Block. | 115mm | 73mm | 11 mm | 84mm apart | 30 |
| 32VA15/38TB | 30M15 Mech and 38TB Terminal Block in Standard Size Plate. | 115 mm | 73 mm | 11 mm | 84mm apart | 30 |
| 38 | Grommet, suits up to $2.5 \mathrm{~mm}^{2}$ ordinary duty flex cord. |  |  |  | N/A | 30 |
| 38A | Grommet, suits up to $1.5 \mathrm{~mm}^{2}$ ordinary duty flex cord. |  |  |  | N/A | 30 |
| 38X | Grommet, suits up to $1 \mathrm{~mm}^{2}$ ordinary duty flex cord. |  |  |  | N/A | 30 |
| 38Y | Grommet, suits figue 8 two core flex cord. |  |  |  | N/A | 30 |
| 382 | Grommet, suits up to $0.75 \mathrm{~mm}^{2}$ light duty flex cord. |  |  |  | N/A | 30 |
| 38HD | Grommet, suits up to $2.5 \mathrm{~mm}^{2}$ ordinary duty with clamp. | 25 mm | 21mm | 30 mm | N/A | 30 |
| 38TB | Cord Outlet Terminal Block with Grommet, suits 30 Series plates. | 32 mm | 22 mm |  | N/A | 30 |
| PROTECTED SWITCH - 250V, MOULDED, 1 WAY/2 WAY |  |  |  |  |  |  |
| PSMIIO | 10A. | 75 mm | 46mm | 51 mm | 69 mm apart | 31 |
| PSM115 | 15A. | 75 mm | 46mm | 51 mm | 69mm apart | 31 |

PROTECTED SWIICHES - 250V, 10A, ZINC DIE CAST

| PSIIO | Single pole. | 79mm | 51 mm | 50mm | 37 mm apart | 31 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| PSIIO-DC | Single pole, d.c. operation. | 79mm | 51 mm | 50mm | 37 mm apart | 31 |
| PSIIO-DP | Double pole. | 79 mm | 51 mm | 50 mm | 37 mm apart | 31 |
| PSI10-I | Single pole, intermediate. | 79 mm | 51 mm | 50 mm | 37 mm apart | 31 |
| PSIIO-N | Single pole, with neon. | 79 mm | 51 mm | 50 mm | 37 mm apart | 31 |
| PSI10-TW | Single pole, 2 way. | 79 mm | 51 mm | 50mm | 37 mm apart | 31 |
| PSI10-2 | Single pole, two gang. | 101 mm | 79 mm | 50mm | 82 mm apart | 31 |

SWITCH MECHANISMS - 250V UNLIES STATED OTH HRWISE

| Cat No | Description | PAGE |
| :---: | :---: | :---: |
| 30M | $10 \mathrm{~A}, 1$ way/ 2 way - terminal bores of 4.1 mm ø accommodate $4 \times 1.5 \mathrm{~mm}^{2}$ or $3 \times 2.5 \mathrm{~mm}^{2}$ cables. Body fits 22 mm ¢ hole. M rating is 100 . | 56 |
| 30MRD | 10A, 1 way/ 2 way (with red dolly mark)- terminal bores of 4.1 mm ø accommodate $4 \times 1.5 \mathrm{~mm}^{2}$ or $3 \times 2.5 \mathrm{~mm}^{2}$ cables. Body fits $22 \mathrm{~mm} ø$ hole.M rating is 100 . | 56 |
| 30FLM | $10 \mathrm{~A}, 1$ way/ 2 way (suits fluoro loads)- terminal bores of $4.1 \mathrm{~mm} \varnothing$ accommodate $4 \times 1.5 \mathrm{~mm}^{2}$ or $3 \times 2.5 \mathrm{~mm}^{2}$ cables. Body fits $22 \mathrm{~mm} ø$ hole. M rating is 120 . | 56 |
| 30FLM15 | $15 \mathrm{~A}, 1$ way/ 2 way (suits fluoro loads)- terminal bores of 4.1 mm ø accommodate $4 \times 1.5 \mathrm{~mm}^{2}$ or $3 \times 2.5 \mathrm{~mm}^{2}$ cables. Body fits $22 \mathrm{~mm} ø$ hole. M rating is 90 . | 56 |
| 30RSM2 | 15 A , Rotary (20n-2 0ff) - also suitable for 12V d.c. 15A, and audio and control applications. Switch positions indicated in window.M rating is 50. | 56 |
| 30RSM3 | 15 A , Rotary (3 $0 \mathrm{n}-10 \mathrm{ff}$ ) - also suitable for 12V d.c. 15A, and audio and control applications. Switch positions indicated in window.M rating is 50. | 56 |
| 30MCO | 10A, Changeover, double throw (selects alternate circuits). | 56 |
| 30MI | 10A, Intermediate - four terminals of $3.5 \mathrm{~mm} ø$ accommodates $2 \times 2.5 \mathrm{~mm}^{2}$ cables. Body fits $22 \mathrm{~mm} ø$ hole. | 56 |
| 30MBP | 440V/15A, Bell press - offers facility for momentary ON or OFF (one Looping terminal). | 56 |
| 30MBPN | 15A, Illuminated bell press - offers facility for momentary ON or OFF. Neon is connected across terminals 1 \& 4.Alternative lamp voltages available. | 56 |
| 30MBPR | 10A, Bell press rocker - offers facility for momentary ON or OFF. Suitable for extra low voltage applications (one Looping terminal). | 56 |
| 30MD | $10 \mathrm{~A}, 1$ way, double pole, single throw - terminal bores of 4.1mm ø accommodate $4 \times 1.5 \mathrm{~mm}^{2}$ or $3 \times 2.5 \mathrm{~mm}^{2}$ cables. Body fits $22 \mathrm{~mm} ø$ hole.M rating is 90 . | 56 |
| 30HMD | 10A, double pole, marked "HEAT". | 56 |
| 30MD2 | 10A, 2 Way, double pole, double throw - six terminal bores of 4.1mm ø accommodate $4 \times 1.5 \mathrm{~mm}^{2}$ or $3 \times 2.5 \mathrm{~mm}^{2}$ cables. M rating is 75 . | 56 |
| 30MD15 | 15 A , 1 way, double pole, single throw - terminal bores of $4.1 \mathrm{~mm} ø$ accommodate $4 \times 1.5 \mathrm{~mm}^{2}$ or $3 \times 2.5 \mathrm{~mm}^{2}$ cables. Body fits $22 \mathrm{~mm} ø$ hole.M rating is 90 . | 56 |
| 30MD20 | 20A, 1 way, double pole -4 terminals of $1.5 \mathrm{~mm} ø$ accommodate $3 \times 2.5 \mathrm{~mm}^{2}$ cables. Body fits $34 \mathrm{~mm} ø$ hole. M rating is 100 . | 56 |
| 30M15 | 15A, 1 way/2 way - terminal bores of $4.1 \mathrm{~mm} ø$ accommodate $4 \times 1.5 \mathrm{~mm}^{2}$ or $3 \times 2.5 \mathrm{~mm}^{2}$ cables. Body fits $22 \mathrm{~mm} ø$ hole. M rating is 90 . | 56 |
| 30M15RD | $15 \mathrm{~A}, 1$ way/ 2 way (with red dolly mark)- terminal bores of $4.1 \mathrm{~mm} \varnothing$ accommodate $4 \times 1.5 \mathrm{~mm}^{2}$ or $3 \times 2.5 \mathrm{~mm}^{2}$ cables. Body fits $22 \mathrm{~mm} ø$ hole. M rating is 90 . | 56 |
| 30M20 | 20A, 1 way/2 way - terminal bores of $4.1 \mathrm{~mm} ø$ accommodate $4 \times 1.5 \mathrm{~mm}^{2}$ or $3 \times 2.5 \mathrm{~mm}^{2}$ cables. Body fits $22 \mathrm{~mm} ø$ hole. M rating is 90 . | 56 |
| 30M35 | $35 \mathrm{~A}, 1$ way/2 way - terminal bore of $3.6 \mathrm{~mm} ø$ \& Looping terminal bore of $3.9 \mathrm{~mm} \varnothing$. M rating is 160 . Marked 35A. | 56 |
| 30TKM | 20A (5A fluorescent load), 1 way/2 way, toggle key actuated - one Looping terminal. M rating is 100. | 56 |
| 30/1/2LM | $10 \mathrm{~A}, 1$ way (two Looping terminals) - terminal bores of 4.1 mm ø accommodate $4 \times 1.5 \mathrm{~mm}^{2}$ or $3 \times 2.5 \mathrm{~mm}^{2}$ cables. Body fits $22 \mathrm{~mm} ø$ hole. M rating is 100 . | 56 |
| 30/1ELM | 10A, 1 way (one Looping \& one Earth terminal) - terminal bores of $4.1 \mathrm{~mm} ø$ accommodate $4 \times 1.5 \mathrm{~mm}^{2}$ or $3 \times 2.5 \mathrm{~mm}^{2}$ cables. Body fits $22 \mathrm{~mm} ø$ hole. M rating is 100 . | 56 |
| 30/1NM | 10A, 1 way rocker with neon indicator - neon can be wired to indicate ON, OFF or POWER AVAILABLE. Looping/switch terminal bores of $4.1 \mathrm{~mm} ø$. Body fits $34 \mathrm{~mm} ø$ hole (Note: Neutral required). | 56 |
| 30/2NM | 10A, 2 way rocker with neon indicator - neon can be wired to indicate ON, OFF or POWER AVAILABLE. Looping/switch terminal bores of 4.1mm ø. Body fits $34 \mathrm{~mm} ø$ hole (Note: Neutral not required). | 56 |
| 30/5M | 10A, 1 way/ 2 way (with 5 terminals - one Looping and one Earth terminal). Terminal bore of Common, Looping and Earth of $5.3 \mathrm{~mm} ø$ accommodates $4 \times 2.5 \mathrm{~mm}^{2}$ cables. Terminal bore of 1 ' ' and ' 2 ' of $4.1 \mathrm{~mm} \varnothing$ accommodates $4 \times 1.5 \mathrm{~mm}^{2}$ or $3 \times 2.5 \mathrm{~mm}^{2}$ cables. Body fits $26 \mathrm{~mm} \varnothing$ hole. M rating is 40 . | 56 |
