Minimal, sleek

Our architecturally inspired finesse range impresses with its minimalistic and precise design, and is considered to be ingeniously refined.

So fine, just stunning

silhouette has an uncomplicated and elegant form based on serene balance of proportions and reduction of the object essentials, giving the product the right tone of voice.

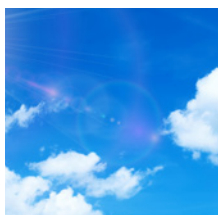

Authentic, honest

The refined translucent edge that surrounds allure, accentuates its elegant profile. The range offers ease of installation and an exquisite aesthetic.

Roto-loc® mechanism

The patented rotoloc system eliminates the possibility of the mechanism being pushed back into the wall cavity.

UV Stabilised

Strong impact resistant polycarbonate material will not 'yellow' over time.

Child safety shutters

A spring loaded shutter protects little fingers from live parts inside sockets.

Added value

A full range of new accessories including new press switches, HDMI mechanisms and USB Type A + C chargers.
