General Introduction

**ARTEOR™** — versatility and a global vision for any installation level

Arteor™ is the innovative answer to the increasingly complex requirements in the building industry worldwide. Arteor™ excels with its unique aesthetics, rich choice of innovative designs and ergonomical options.

6  
7

The range reaches from wiring devices, through to innovative radio automation solutions, up to fully networked home automation systems based on BUS technology, which can also be integrated into third party solutions.

# ARTEOR™: the ideal solution, always and everywhere

Its versatility makes Arteor™ the ideal choice for every kind of project, anywhere in the world at any installation level. Arteor™ suits any requirement in terms of design and function for every kind of building, from residential to commercial.

## Multi-Dwelling Units

## Villas

## Offices

8

9

## Hotels

# \_ARTEOR™: truly international

Euro/US, Italy, French  
and German standard

British Standard

Korea

Euro/US/China

Italy

Arteor™ has been developed as an authentic international concept. This international approach enables it to fulfil local market requirements with specific solutions, designed to match local installation requirements.

\*Arteor™ products shown here may not be available in Australia. Please contact our sales office for international specifications requirements.

Arteor™ is compatible with any kind of wall box. Some examples:

Italian type

British type

10

11

South Africa

Australia

The Arteor™ range provides all major standards and types of sockets:

British, US, Italian, German, French, Korean, Indian, Chinese, Australian, South African...

ARTIFICIAL

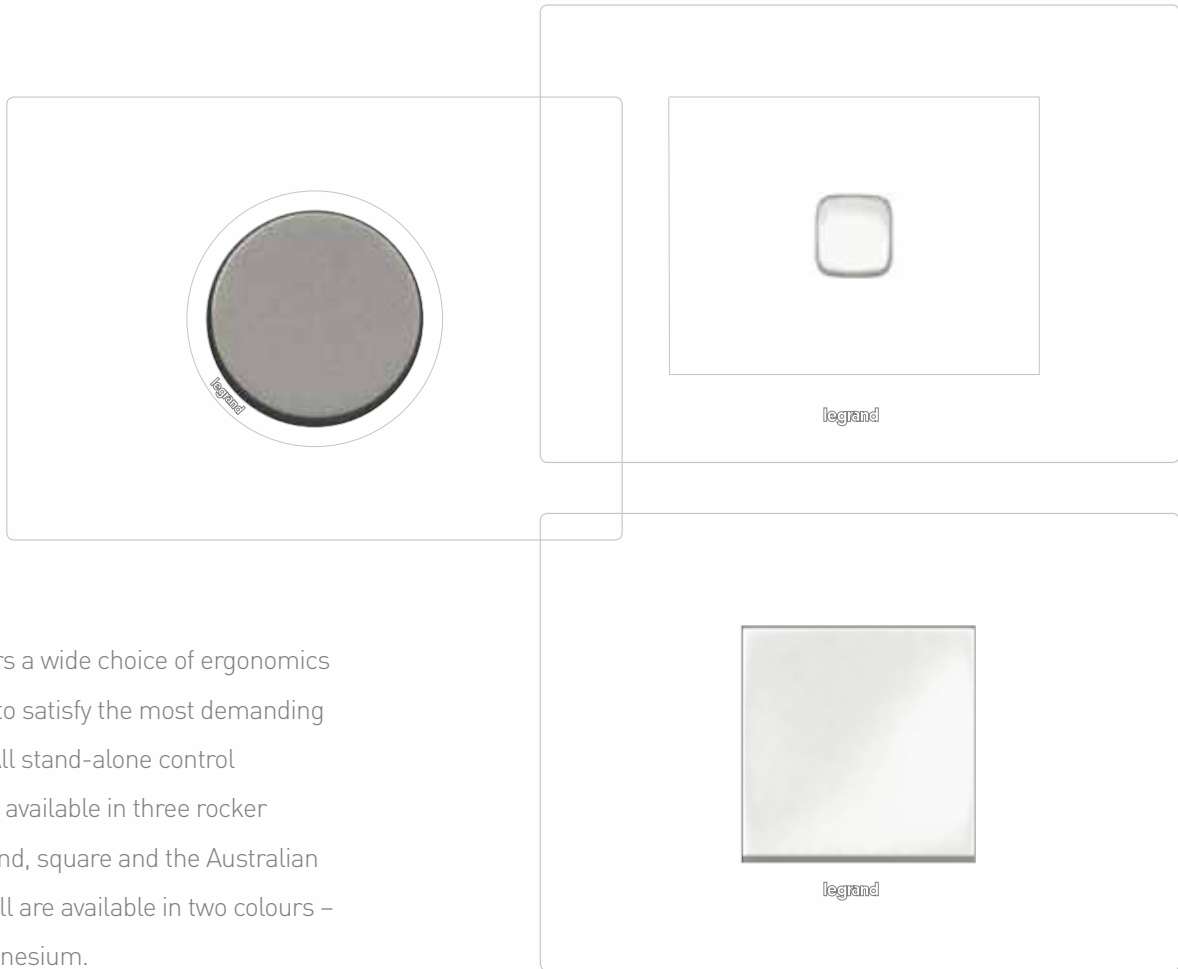

Design

## **\_Design** for a global lifestyle

The timeless design of Arteor™ features clearly defined hi-tech characteristics understandable anywhere in the world. Minimalist and sober, its carefully crafted design is inspired by the most modern technological devices, such as flat screens and digital photo frames, creating the impression that the product is floating on the wall.

# \_Design options for control functions

Arteor™ offers a wide choice of ergonomics and finishes to satisfy the most demanding customers. All stand-alone control functions are available in three rocker shapes – round, square and the Australian “770” style. All are available in two colours – white or magnesium.

14  
—  
15

## A rich choice of finishes

### NEUTRAL

Classical tones for perfect harmony with modern environments, whether residential or commercial.

White

Graphite

PearlAlu

## TATTOO

16  
—  
17

The modernist collection with a cultural touch. Timeless yet trendy, adding an individual note to living environments.

Edition 1

## A rich choice of finishes

### MIRROR

A selection of brilliant mirror finishes combined with metal to enhance the technological character of the range.

Mirror White

Mirror Black

Mirror Taupe

Mirror Red

## GRAPHIC

A minimalist style that reinvents the classical 70s retro with a touch of timeless sophistication.

Formal

18

19

Casual

FOR DEPOSITS

## A rich choice of finishes

### BRUSHED METAL

Authentic metal in cold and warm tones. This collection suits modern interiors as well as classic-style environments.

Gold Brass

Stainless Steel

## WOOD

Nature meets technology in a perfect combination of natural materials and metal details.

Light Oak

20  
—  
21

Wenge Style

A rich choice of finishes

## LEATHER

Galuchat

Club

A luxury finish made of high-quality authentic leather, designed for sophisticated environments. Arteor™ is the only range featuring Galuchat: this precious fish leather makes luxury a living part of interior design.

## SIGNATURE

Woven metal, a hi-tech material which requires special processing skills. An extraordinary choice for the most demanding customers.

22

23

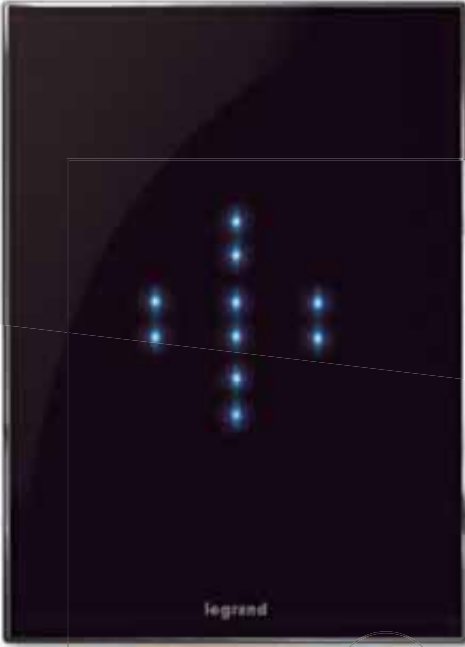

Woven Metal

## Design options for home automation

While similar in design to the stand-alone devices the home automation control functions provide even more technological features.

Touch plate control

Touch plate scenario control

## \_Graphic user interfaces

The Arteor™ range offers a wide choice of graphic user interfaces speaking the same "icon language" as modern electronic consumer devices. These clearly designed icons allow the user to browse the different functions of the Home Automation system in an intuitive way.

3.5" Touch Screen

1.2" Touch Screen

10" Multimedia Touch Screen

Installation features

## **\_Versatility and modularity** for unrivalled flexibility

The Arteor™ range offers maximum flexibility in terms of installation and configuration. Each support frame can take mechanisms with either round or square rockers and matches with any kind of plate, whether basic or high end.

The modular concept allows for any kind of individual customised configuration even in tight spaces.

30

31

Arteor™ mechanisms are fully compatible with Legrand floor boxes, columns and trunking system.

## \_Installation **safety** first

Specific to 3 module frames: flaps ensure safety when two modules are installed on a 3-module support frame. Flaps avoid any contact with the wires and can be broken out according to individual needs.

## Safety at every step of the installation process

Support frames and plates are each supplied with special protective shells. This ensures protection of the product against dust and paint. Full protection - whether only support frame and mechanism are installed...

... or whether the complete product is mounted before completion of site work.

Protective shells should be removed only once site work is fully completed.

32

33

ARTEOR

Home Automation

# \_Home automation general features

36

37

The comprehensive and versatile home automation solution, which is integrated to the Arteor™ line will satisfy your most demanding customers' needs. This is answer for any kind of home automation requirement: from automation of a single function, via different independent functions through to completely networked integrated solutions.

# One solution, two technologies, endless possibilities

Comfort and entertainment

Sound distribution

Communication

Door entry systems

Access control

Coded keypad reader

Comfort and energy saving

Temperature management

Arteor™ offers one unique system  
comprising solutions for any application.

### Remote management

Webserver

### Centralisation, integration, communication and multimedia

10" Multimedia Touch Screen

### Comfort

Shutter control

### Comfort

Lighting management

38

39

The system works through two different media:

- radio using ZigBee® protocol
- BUS using SCS protocol

Products have been developed to ensure perfect interoperability and maximum reliability of the system. Arteor™ home automation installations offer a high level of flexibility.

## Radio offer

the easy way to home automation

### “Plug & Play” - no special wiring

The radio solutions based on the ZigBee®\* protocol use the existing electrical infrastructure and require no special wiring.

### “Push & Learn” configuration

The products can be easily configured directly on the device itself by the “push and learn principle”. No specific software needed.

\* ZigBee® Certified Product - Manufacturer Specific Profile

### When to use it

It is the ideal choice:

- if you want to upgrade your conventional electrical installation to a home automation system
- when an extension is needed on an existing home automation system (e.g. you just want to add a control point to an existing installation)
- if it is not possible to make changes on the electrical installation and no recabling is allowed (e.g. renovation)
- for less complex new installations not requiring multiple applications (for example, lighting control only)

40

41

## \_Radio offer

## \_Principle of Radio automation

Remote management of receivers is ensured by battery-powered surface-mounted transmitters.

Radio devices can fall into two categories:

- Actuators (transceivers) which are connected to the load and to the mains supply
- Controls (transmitters) powered by battery

Flush-mounted receivers control loads

# \_The ZigBee® Protocol

## Recognised worldwide

The ZigBee® protocol has been developed by an alliance of many international players.

This new radio transmission protocol is based on the IEEE 802.15.4 wireless personal area network standard. It works on the 2.4GHz frequency which can be used throughout the world. This means Arteor™ home automation solutions can be installed anywhere in the world.

ZigBee® based radio solutions\* are even suitable for complex installations, they ensure high performance and excellent reliability.

4-scenario touch plate

\* ZigBee® Certified Product - Manufacturer Specific Profile

## Radio Offer: functions

The radio solutions offered by the Arteur™ line comprise management of lights, shutters, scenarios and technical alarms.

Shutter switch

Pocket remote control

44

45

## Bus offer

### 2-wire BUS technology

The Legrand BUS offer is based on 2-wire BUS working on the private SCS protocol.

### When to use it

Ideal for new installations, the BUS system integrates different applications – such as comfort, safety, energy saving functions, door entry systems, management of multimedia contents, remote supervision and control – offering fully networked solutions.

### Radio extension

The BUS system can be extended with Arteor™ radio solutions through the SCS/ZigBee® gateway.

### Open to Third Party solutions

- The BUS system guarantees integration with DALI and KNX through dedicated gateways.
- Interoperability between this Legrand system and third party home automation systems can be achieved through the OpenWebNet protocol.

46

47

## \_2-wire BUS offer: SCS

All devices are connected in parallel to the BUS, which is a cable with twisted pairs.

The functions associated to each product depend on the given configuration.

## \_Configuration

### Easy configuration

The product can be configured using physical configurators on the product itself or through virtual configuration via computer.

Description of the configurator housing

Configurator housing

Numbered configurator

Tool for insertion of configurator

48

49

## \_Centralized architecture

The system is composed of actuators and control devices.

Actuators which control the loads are connected to the BUS and to the power line. They are DIN module

devices centralized on the electrical panel board.

Control devices transmit information to actuators through the BUS line.

They are installed in every room.

Innovation in functions

# Stand-alone solutions for modern living:

## Comfort

Micropush switch

Electronic micropush switch

No touch switch

Allows to control light sources by simply passing the hand in front of it

Universal Dimmer

Suitable for dimming most loads

## Energy saving

Automatic switch

For automatic lighting control

Electronic room thermostat

For active temperature management

# \_Safety

Australian socket

Autoswitched socket with internal safety shutters

Skirting light with detector

Detects a passing person and lights obstacles automatically

Time delay switch

For timer control of a circuit

Arteor™ provides innovative solutions for modern living, enhanced comfort, energy saving and greater safety.

The range offers a great variety of functions that meet all the requirements of modern installations.

Options include motion sensitive and automatic switches, dimmers and room thermostats.

**\_ Focus on stand-alone office solutions:**  
**\_ lighting control**

Skirting light with detector

Automatic switch

**\_ access control**

Coded keypad reader

Fingerprint reader

From specific products for adaptable or automatic control of lighting via solutions for access control right through to a wide variety of data, audio and video sockets: Arteor™ contributes to make office buildings operate in a way that is functionally optimal and energy efficient at once.

# \_access to data

RJ45

USB/YUV

Wi-Fi access point

HDMI

Female HD15 + Jack 3.5 mm

USB/YUV

Reliable access to data or the internet and flexible use of modern audio and video devices - Arteor™ adapts to all digital developments and provides perfect connections, whatever the requirement.

# \_Hotel solutions \_at the door

Keycard switch

External unit

Internal unit

# \_near the bed

4-Scenario touch control

Desk and entrance light

Bed light

## \_work & leisure area

Data, audio and video sockets

S-Video socket

From the entrance of the hotel room to the bedside table – Arteor™ solutions for the specific needs of the current hotel industry are designed to enhance customer comfort. And to perfectly meet their requirements for easy connection of various multimedia devices (MP3 players, digital cameras, USB drives, etc.) and flexible access to the internet.

TV

\*Arteor™ products shown here are stocked in Australia and New Zealand. Multigang plates are available for projects on special order. Please contact our sales office to discuss your project specification requirements.

## Arteor™ Wi-Fi access points

5723 76

Mechanisms supplied with White and Magnesium square cover plates  
To be equipped with support frames Cat. No. 5760 11 and plates (white Cat No. 5750 30 or pearl aluminium Cat. No. 5750 31)

Pack	Cat. No.		Wi-Fi access point
1	● White	● Magnesium	Come in addition to a new or existing LCS structured cabling, to meet the requirements for mobility in the building (meeting rooms for example) Identical connection to the LCS RJ 45 socket Remote management via a web interface Allow the configuration and the exploitation of the Wi-Fi access point by the network administrator. Security via WPA2 encryption (802.11i) and/or authentication (802.11x) Guest access to offer free access to the guests and keep independent and secure the main Wi-Fi network Supply via Power over Ethernet (standard 802.3 af) 4 modules 22.5 x 45 mm Standards 802.11a and 802.11b/g dual-band dual-radio Data rate: 54 Mbps max. on each frequency (802.11a and 802.11g) Equipped with an RJ 45 socket on the front panel
	5723 76	5728 76	
1	5723 77	5728 77	Standards 802.11a and 802.11b/g dual-band dual-radio Data rate: 54 Mbps max. on each frequency (802.11a and 802.11g)

## Arteor™ Wi-Fi access points

### ■ Installation principle

### ■ Arteor Wi-Fi access points

#### A 802.11 a and b/g solution

Radio communication standard	802.11 b/g	802.11 a
Power over Ethernet standard	802.3 af	
Frequency band	between 2.40 and 2.48 GHz	5 GHz
Number of available channels	13	8
Max. data rate	54 Mbps	54 Mbps

### ■ Advantages of a Legrand Wi-Fi access point

- Possibility of simultaneous operation on 2 frequencies, a and b/g  
Provides a max. data rate of up to 2 x 54 Mbps in simultaneous mode
- Very high security level: encryption (WPA2 - 802.11i) and authentication (802.1x)
- Possibility of roaming (moving from one access point to another without breaking the link)
- Quality of service (priority automatically given to voice, then video and finally data) in accordance with standard 802.11e
- Easy to configure and make secure with the quick configuration node

**NEW:** Guest access to offer a free access for the guest and keep independent and secure the main Wi-Fi network

### ■ Installation

In all supports that can take an Arteor mechanism (ducting, columns, flush-mounting boxes, floor boxes, etc)

Do not place access points behind an obstacle that would limit the radiation of the antenna

Access points are connected in the same way as RJ 45 sockets

### ■ Sizing

- Provide 1 access point for 1 localised requirement
- Provide 1 access point per 100 m<sup>2</sup> for global coverage and a maximum gross speed
- Provide 1 access point with an RJ 45 socket for an office used by visitors

# ZigBee®\* radio technology

The standard for radio (wireless) solutions, ideal for refurbishment, small new installations and increasing the number of control points, without damaging the walls.

## INTERACTIVITY OF FUNCTIONS

ZigBee® radio technology is an international low consumption radio communication standard. Operating at a frequency of 2.4 GHz, it can be used, via transmitters (wireless) and receivers, to control lighting,

roller blinds, as well as technical alarms. It can also control scenarios, and allows bidirectional communication between devices. It can be used in addition to the BUS system.

## WIRING DIAGRAM

\* ZigBee® Certified product - Manufacturer Specific Profile

▶ LIGHTING CONTROL

**RECEIVER DIMMER SWITCH**  
(See p. 104)  
Indicates the light intensity via LEDs

▶ SCENARIO CONTROL

**4 SCENARIOS CONTROL**  
(See p. 104)  
For lighting, roller blinds...

▶ ROLLER BLIND CONTROL

**INDIVIDUAL RECEIVER ROLLER BLINDS SWITCH**  
(See p. 104)  
Controls any type of electric roller blind motor

- A** Indicates lighting control
- B** Indicates roller blinds control

ZigBee®: Certified product - Manufacturer Specific Profile

# BUS/SCS technology

With 2 dedicated wires, for creating scenarios that incorporate all the functions for large living areas: lighting, automation, video door entry system, etc.

## MULTIPLICATION OF FUNCTIONS WITHOUT ANY SPACE CONSTRAINTS.

BUS/SCS technology can manage various different functions at the same time via 2-wire extra low voltage cables.

It enables a number of functions which can be integrated through scenarios and designed to adapt the user's environment as required.

## WIRING DIAGRAM

▶ VIDEO DOOR ENTRY SYSTEM

**AUDIO AND VIDEO DOOR ENTRY SYSTEM**  
(See p. 122)  
Controls opening, with the possibility of intercommunication with other units

▶ SCENARIO CONTROL

**SCENARIO CONTROL**  
(See p. 110)  
For activation of 4 scenarios

▶ TEMPERATURE CONTROL

**CENTRAL UNIT FOR TEMPERATURE CONTROL**  
(See p. 116)  
Can manage up to 99 zones

▶ ROLLER BLINDS CONTROL

**ROLLER BLIND CONTROL**  
(See p. 110)  
Controls any type of electric roller blinds

▶ DIN-RAIL ACTUATORS AND HOUSE MANAGEMENT

**DIN RAIL ACTUATORS**  
(See p. 112)  
To be associated to load and control mechanisms

**TOUCH SCREEN**  
(See p. 121)  
Activation of 4 scenarios, of temperature, of sound distribution functions

▶ SOUND DISTRIBUTION

**SOUND DISTRIBUTION CONTROL**  
(See p. 118)  
Control and selection of audio sources

▶ MOVEMENT DETECTION

**SENSOR**  
(See p. 124)  
Activation of lights by movement sensors

038 42

026 02

036 52

036 53

Technical characteristics (p. 115)

Pack	Cat. No.	<b>DIN rail actuators 240 V<sub>~</sub> - 50/60 Hz</b>
1	038 41	N/O contact To be associated to loads and control mechanisms (p. 110) 1-output relay for controlling 1 circuit Maximum load: 16 A resistive load 2 DIN modules
1	038 42	2-output relay for controlling 2 circuits Maximum load per circuit: 6 A resistive load or incandescent lamps 1 x 500 VA for roller blinds with end stops 2 DIN modules
1	038 44	4-output relay for controlling 4 circuits Maximum load per circuit: 6 A resistive load 2 DIN modules
1	026 02	Relay with 4 x 16 A outputs 6 DIN modules
<b>DIN rail dimmers</b>		
To be associated to loads and control mechanisms (p. 110) for dimming control		
1	036 52	<b>Leading edge dimmers</b> Maximum load: 60 - 1000 W / 230-240 V <sub>~</sub> - 50 Hz 4 DIN modules
1	036 53	<b>Trailing edge dimmers</b> Maximum load: 0.25 to 1.7 A / 230-240 V <sub>~</sub> - 50 Hz 4 DIN modules
1	036 56	<b>For electronic ballast 0-10V</b> Maximum load: 500 VA 2 DIN modules
<b>RJ adaptor</b>		
10	488 72	For connecting Cat. No. 026 02/21/22/11 to the BUS

Pack	Cat. No.	<b>BUS power supplies</b>
1	035 60	Input voltage: 230-240 V <sub>~</sub> output voltage 27 V <sub>~</sub> Maximum consumption: 300 mA Maximum current supplied: 1.2 A 8 DIN modules
<b>SCS / DALI interface</b>		
1	026 31	Allows the communication between SCS installation and lighting devices controlled by DALI protocol 6 DIN modules
<b>Contact interfaces</b>		
Allow the connection between traditional wiring devices such as switches, time delay switches or external sensors and BUS installation to control 2 actuators for single function or 1 actuator for double functions 2 independent contacts 2 DIN modules		
1	035 53	2 DIN modules
1	5739 96	Basic modularity To be installed in flush-mounting box

# Arteor™ BUS/SCS

lighting control and automation

## ■ System principle

The Lighting Control system allows the management of different functions in a simultaneous and integrated way. All the components of the Lighting Control system are interconnected via an electronic circuit that can be programmed: the BUS. The information is exchanged through the 2 wire BUS cable at low voltage (27 V<sub>~</sub>).

There are two types of devices in the system:

- the controls units, which are connected only to the BUS cable and
- the actuators, connected both, to the BUS cable and to the 230V<sub>~</sub> mains power line for managing the connected load

When the Lighting Control system devices are configured properly, it is possible to manage the load as follows:

- control for a single load
- control for one or more load groups;
- simultaneous management of all loads

It is also possible to carry out special functions, which can hardly be achieved with conventional electrical systems. These functions are called scenarios.

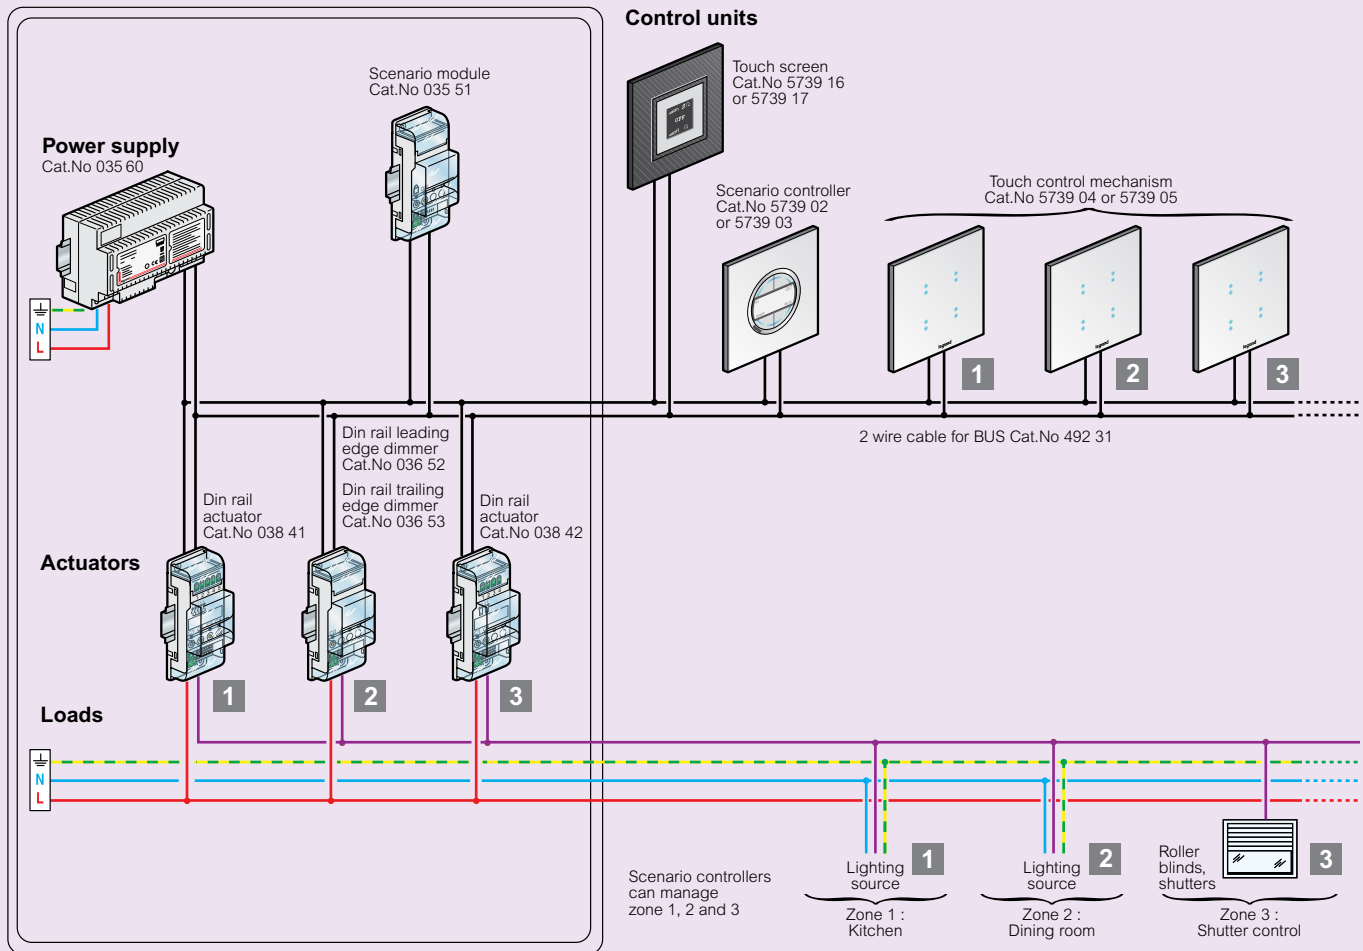

One scenario is a set of simultaneous control of multiple groups of loads, used in order to modify the environment according to the user's needs.

An example of a scenario can be represented by the simultaneous activation of lights, which can be set by the user after getting inside the building by using one single control device or by using the Touch Screen menu.

## ■ Installation principle

sound distribution

Support frames and plates selection charts (p. 92 to 93)

Pack	Cat. No.	Amplifiers
1	5739 76	<b>Flush-mounting amplifier</b> 16 W - 2 modules To be equipped with round version key cover and plate (p. 92 to 93)
1	035 85	<b>DIN rail amplifiers</b> 16 W - 100/240 V <sub>~</sub> 4 DIN modules
1	035 83	30 W - 100/240 V <sub>~</sub> 10 DIN modules
		<b>1-module key covers</b> For flush-mounting amplifier Cat. No. 5739 76
5	White 5739 66   Magnesium 5739 67	Right-hand side mounting with marking
5	5739 64   5739 65	Left-hand side mounting with marking

Pack	Cat. No.	RCA inputs
1	White 5739 26   Magnesium 5739 27	Equipped with White or Magnesium square version cover plate, to be equipped with plates (p. 92 to 93) For connecting a stereo source to the system 2-module mechanism

Pack	Cat. No.	Loudspeakers
1	White 5739 28   Magnesium 5739 29	<b>Flush-mounting</b> 8 ohms - 100 W To be installed in flush-mounting box min. depth 80 mm
1	5739 77	16 ohms - 12 W To be installed in flush-mounting box Cat. No. 893 79 or 892 79
1	5739 30	<b>Surface-mounting</b> 8 ohms - 40 W
1	5739 78	8 ohms 140 W
1	5739 81	<b>False ceiling mounting</b> 8 ohms - 100 W Ø 240 mm
1	5739 82	8 ohms - 20 W Ø 100 mm

Pack	Cat. No.	Touch screens
1	White 5739 16   Magnesium 5739 17	Equipped with White or Magnesium surround, to be equipped with plates (p. 92 to 93) 1.2" touch screen for activation of 4 scenarios or temperature, or sound distribution functions To be equipped with 2 module plates
1	035 84	<b>Audio/video signal distribution devices</b> Multi-channel matrix with cross-connection, mixing switch functions for distribution of the stereo sound source signal and audio/video signals 8 inputs (first 4 for the 2-wire audio/video system and others for stereo sound source) 8 outputs 10 DIN modules
1	5739 98	Audio/video node for mixing audio/video sources (max. 4 sources) 6 DIN modules

Pack	Cat. No.	DIN RDS radio sources
1	035 87	RDS stereo radio tuner with coaxial connector for external aerial antenna Supplied with depth compensator for DIN rail 4 DIN modules
1	5739 89	RDS stereo radio tuner Supplied with depth compensator for DIN rail 4 DIN modules

Pack	Cat. No.	DIN stereo control sources
1	035 86	For stereo sources IR remote control possible RCA/RCA and jack cables to connect to IR transmitters 4 DIN modules

Pack	Cat. No.	Flush-mounting boxes
2	893 79	For loudspeaker Cat. No. 5739 77
2	892 79	For dry partitions - 2 x 3 modules For concrete walls - 2 x 3 modules

(1) Supplied with White plate  
(2) Supplied with Mirror Black plate

## Arteor™ 2-wire (continued) door entry systems

634 34

634 31

Pack	Cat. No.	Accessories for video door entry systems
1	634 34	<b>2-wire video adaptor</b> Video adaptor Use one adaptor per power supply 2 DIN modules
1	634 32	<b>Video signal distributor</b> Video distributor with 4 outputs for intercom module for up to 5 units
1	634 31	<b>Interface for auxiliary control</b> Relay for auxiliary commands Allows the connections of auxiliary functions such as lighting, automatic door opening... 4 DIN modules
1	634 38	<b>Intercommunication module for up to 5 units</b> Intercommunication units. Max. capacity: 5 gangs 4 DIN modules
1	634 33	<b>Door release</b> Door release relay C/O volt-free contact: max 24 V <sub>~</sub> 8 A resistive 4 A inductive 2 DIN modules
1	634 39	<b>Extension interface</b> Extension interface increase system limits in distances and number of internal and external units
1	5740 38	<b>Video signal converter</b> Video signal converter from coaxial to 2-wire bus for 12 V <sub>~</sub> CCTV cameras: the CCTV camera is directly supplied via a terminal
1	5740 39	<b>2-wire/IP interface</b> For extended systems with IP backbone and 2-wire support
1	5740 43	<b>Virtual switchboard software</b> Virtual switchboard software for managing entryphone and video entryphone calls The software (for Windows operating systems) can be installed on any fixed or mobile PC and is used to receive, manage and transfer calls from inside and outside Offers home video control with cyclical CCTV vision, day and night functions and the ability to display the alarms present in the various apartments - Operating systems supported: Microsoft Windows XP Service Pack 2 and Windows Vista - Software required: NET Framework 2.0 or later

## Arteor™ 2-wire video door entry system kits

5740 32 (see composition below)

Pack	Cat. No.	Video door entry system kits
1	5740 32	<b>For 1 apartment or villa</b> Comprising: - 1 street panel supplied complete with special flush-mounting box - 1 hands-free video internal unit equipped with colour display and supplied with special flush-mounting box, support frame and Mirror white plate - 1 power supply - 1 video adaptor Possibility to install up to 4 internal video or audio units
1	5740 33	<b>For 2 apartments</b> Comprising : - 1 street panel supplied complete with special flush-mounting box - 2 hands-free video internal units equipped with colour display and supplied with special flush-mounting box, support frame and Mirror white plate - 1 power supply - 1 video adaptor Possibility to install up to 2 internal video or audio units

SYT 9/10-SYT 8/10 (1 mm <sup>2</sup> )	200 m	200 m	200 m (total max. distance)

### ■ Audio door entry system

Wiring diagram with 1 street panel and 1 audio internal unit  
Cat. No. 5740 11 or 5743 11

### Dimensions of audio internal units Cat. No. 5740 11 and 5743 11

### Installation distances for audio door entry systems

	Audio internal unit	Power supply	Street panel	Door release
0.28 mm <sup>2</sup>	140 m	200 m	30 m	340 m
0.50 mm <sup>2</sup>	210 m	290 m	50 m	500 m
1 mm <sup>2</sup>	420 m	580 m	100 m	1000 m
